## PRODUCT DESCRIPTION

SC-3300 is a clear colorless, low-odor liquid.

## TYPICAL FEATURES AND APPLICATIONS

SC3300 may be used as an adhesion promoter (coupling agent) for organic/inorganic interfaces, as a surface modifier (e.g. regulating surface polarity) or as a crosslinking agent (moisture-curing of polymers).

When used as coupling agent, it generally reduces the sensitivity of the products' mechanical/electrical properties to heat and/or moisture. SC-3300 can be used to improve dry and wet strength in cured composites reinforced with glass fiber rovings. SC-3300 can be used to enhance wet electrical properties of epoxy-based encapsulate and packaging materials, and can be used to eliminate the need for a separate primer in polysulfide and urethane sealants. SC-3300 can be used to improve adhesion in waterborne acrylic sealants and in urethane and epoxy coatings.

SC-3300 reacts with water. Take precautions to avoid contact with atmospheric moisture.
